Front-End Development

## PROJECTS

### Dream Travels

- Made a working static website in React and other frontend technologies, regarding travel management and easy destination planning.
- It has many bookmarkable pointers for easy access along with continuous background changing scenes.
- It also has the feature to contact the management for easily accessing the provided services.

### SKIT Conference Website

- Volunteered for building a dynamic website for the International Conference on Environmental Pollution Abatement & Disaster Management (ICEPADM-2021) which was held in SKIT.
- It is a dynamic website constructed using HTML, CSS, Javascript and Bootstrap.
- It focused on the advisors and speakers which participated in the conference.
- It also had the connectivity for the users to the conference management.

### Car Race Game

- It is a static single player game made by using Javascript.
- It is an endless-runner games which was inspired by the old moto racing games available on old android mobile phones.
- It has a natural background with a road on the middle of the screen while there's traffic coming onto the player from above.
